Location: England, United Kingdom

PROFESSIONAL SUMMARY

Result-driven Software Developer with expertise in C#, .NET (MAUI, Xamarin), JavaScript (React.js, React Native, Node.js, TypeScript), and SQL. Currently pursuing a master's degree in international business with a focus on Data Analysis. Adept at developing innovative software solutions, optimizing infrastructure, and delivering actionable insights through data visualization. Demonstrates a passion for improving user experiences, implementing scalable architectures, and enhancing team productivity. Skilled in Agile methodologies, microservices, and test-driven development, with a proven track record of collaboration and leadership.

KEY SKILLS

- Programming & Development: React.js, React Native, C#, ASP.NET, Node.js, Next.js
- Data Management: SQL (MySQL, PostgreSQL, MongoDB), RESTful APIs, MVC Architecture
- Cloud & DevOps: Azure, AWS, DevOps, Git (GitHub, Bitbucket, Azure DevOps)
- Data Analysis & Visualization: Microsoft Excel, Power BI, Data-Driven Decision Making
- Soft Skills: Communication, Team Leadership, Problem Solving, Operations Management

PROFESSIONAL EXPERIENCE

Software Developer (Part-Time)

TANADE Consulting Ltd., England, UK

August 2024 – Present

- Designed and implemented scalable, high-performance web applications using React.js and React Native.
- Translated complex datasets into actionable insights through advanced data visualization techniques.
- Developed robust software infrastructure to enhance system reliability and user experience.
- Ensured technical feasibility and scalability of UI/UX designs.

Software Engineer

Axxess Inc., USA

May 2022 – September 2023

- Developed software applications using ASP.NET, .NET Core, SQL Server, and C#.
- Enhanced existing systems by analysing business objectives and implementing modifications.
- Maintained software systems, ensuring performance optimization and defect resolution.
- Investigated emerging technologies and implemented them to improve system efficiency.

Software Developer

Complustech Limited, Nigeria

December 2019 – February 2022

- Created interactive mobile applications using React Native and Xamarin.
- Designed structured and scalable software architectures leveraging RESTful APIs and MVC patterns.
- Conducted test-driven development to ensure reliability and maintainability.

EDUCATION

M.Sc. International Business with Data Analysis

Ulster University, United Kingdom (Expected: 2025)

Bachelor of Engineering (B.Eng) – Mining Engineering

Federal University of Technology Akure, Nigeria

CERTIFICATIONS

Microsoft Azure Fundamentals

Code 360 Certification

NOTABLE PROJECTS

- Contributed to Axxess.com, a health care platform in the USA
- Faith Connect: A social media platform for church members
- Waka App: A traffic web application and public places locator
- Data-Driven Rental Pricing Analysis (Academic Project): Analysed the impact of rental pricing strategies on tenant satisfaction using advanced data analysis tools.
- Optimizing Netflix's Content Recommendation System (Personal Research): Investigated data-driven approaches to improve user engagement and retention.

TECHNICAL TOOLS & FRAMEWORKS

- Languages & Frameworks: React.js, React Native, Node.js, ASP.NET, TypeScript, Python (for data analysis)
- Databases: MySQL, MongoDB, PostgreSQL, SQL Server
- Visualization Tools: Microsoft Excel, Power BI
